Value ★★★★★

What Are Your Thoughts?

Apple recently revealed their new iPhones, the 6 and 6 plus. Like the previous 5s, it has the finger print idea like the new iPad air, which we will be talking about soon. It also has a much better camera. These are much thinner. One flaw of the 6 plus is how large it is. For those who need a large screen your in luck, but if your the opposite than this mini, mini iPad isn't for you. There is also a new feature where you can double tap the home button and be able to contact some one from there.

Duck Hunt If you were wondering who that new dog character is in *Super Smash Bros* for Wii U. He's from *Duck Hunt*, a popular game that came out in 1984. This game is quite old but it's still fun to play. This game was released in 1984. It was a sharp shooter game where you were supposed to shoot flying ducks and the dog would catch them. You would use something like the Nerf shooter and try to shoot the ducks. The thing that made people mad was that every time a duck escaped the dog would make the most annoying laugh like from an "old cartoon dog laugh". This is why many people liked that *Duck Hunt* was in *Super Smash Bros Wii U* to beat the pulp out of him.

Gaming

Bracelet Craze?

Two bracelets and a craze for them. Lokai bracelet and Alex and Ani bracelets are the most wanted bracelets ever right now. Lokai bracelets contain mud from the black sea in the black bead and water from Mount Everest in the white bead. The rest of the beads are clear because the creator of this wanted each and everyone to find their own story of balance to tell. Meanwhile, Alex and Ani bracelets bring us positive energy. Alex and Ani sells bangles, bracelet, necklaces, earrings, rings, and handbags. Both of these bracelets are great to wear during this season. Happy new year! :) R & A

beat the pulp out of him.

Cam Newton Involved in Car Crash

As many people may have already found out, Cam Newton (the Carolina Panthers' quarterback), was involved in a car crash on Tuesday (12-9-14). Reports say that his truck and a car collided causing his truck to roll over several times while he was driving in Charlotte, North Carolina. He was soon taken to a hospital to see what the injuries were. Newton has two fractures in his back now, due to the crash. Thankfully, he did not suffer any life-threatening injuries and is hopefully beginning to recuperate. Get well soon Cam! -Bryson B.

Hoops For Heart

SCHOOL-WIDE EVENTS

Hoops for Heart. Every year, this event, which is already well-known throughout the student community, has raised large amounts of money for heart research. This money then goes to the American Heart Association, a foundation dedicated to learning more about heart disease.

On Monday, a short presentation was made to the gym classes about this important topic. That morning, students got donation forms and were encouraged to make a contribution. On the form, is a list of the prizes you could get by donating a specific amount of money, including a basketball or even a scooter (If you donate more than \$1000). This morning, an assembly will take place to provide more information about this fundraiser to the students. While the event will happen in February, it is essential to start the donations and get family and friends to contribute to the cause now. So start donating - not only will you receive prizes, you will help save lives and increase our future knowledge of heart problems! *-Andy B.*

TECHNOLOGY

Sphero 2.0 A new toy/ invention has everyone excited. This is the SPHERO 2.0 which is an app controlled ball. But this is not just a regular ball. Once you buy the ball for only \$129.99, you can download the app which has several games to use the sphero with. The price may seem a bit steep, but you don't have to worry about breaking it because it is "life-proof." The power to control the Sphero 2.0 is in your hands.

Just move your fingers across the phone screen to move it wireless. It is a very "bright" idea since it lights up and changes colors. From my personal experience it is worth every penny, because it'll roll the boredom right out of you. *-Antonio and Jordan (visit our website to see the Sphero in action!)*

Movies

JURRASIC PARK 4 "Clever girl they made a new one." They made a new one, yes Jurassic Park has a forth movie and this time the park is open and successful. Also, as usual, the park goes south, but this time there is a genetically engineered dinosaur. That means In-Gen ignored the lessons of the last times: "Don't play God." So when Summer 2015 comes along, avoid the raptors, remember that the T-Rex's vision is based on movement and you just might survive.

ASK AN EIGHTH GRADER

Dear Eighth Grader,
 This year, homework in most classes are due all over the place. Do you think it would be best to start with something lengthy, but due later, or something short, but due earlier? Sometimes I end up having to do much of the lengthy homework in just a few nights because I usually stick with the short homework first. :)

- Periwinkle

Homework

Hey Periwinkle,
 I know that you may think the planner the school gave you is useless. **But. It's. Not.** You should always do what is due first, but always save time for the lengthy homework. Use your planner to help plot out how much time you think it would take to do the assignment.

Also you might want to meet with the teacher for suggested guidelines. Don't be worried if you end up spending until 6:00pm doing your homework. Middle School is meant to be the beginning of a long path to success, but is worth the cost when you become the boss of a big name company.

Best Wishes,
 An 8th Grader
